

**FINGERPRINTING SERVICES**

Fingerprints submitted to the Arizona Department of Insurance must be applied to the fingerprint card by a qualified fingerprinting technician. The following is a *partial* list of organizations, firms and individuals who offer fingerprinting services. **The Insurance Department does not regulate fingerprint card technicians and does not attest to the quality of services provided.**

**FINGERPRINT CARD:** ONLY use the blue-outlined, matte finish fingerprint card (Form FD-258).

All spaces must be completed in **black ink** only. Be sure the information is within the allotted space and not over the line. You must clearly print all information on the card except for the signature. Fingerprints which are smeared, too dark, too light, or are generally illegible and which cannot be read or processed by the FBI will be rejected and returned, and you will be required to submit another set of fingerprints. Also, do not use a highlighter pen anywhere on the card as the FBI will reject all cards containing highlighter markings. We recommend you review your fingerprints before leaving the fingerprinting service. Refer to the reverse side of the fingerprint card which outlines FBI standards of readable prints.

We **strongly** suggest that you contact the fingerprinting organization, firm or individual to inquire about the cost, business hours, restrictions, and information or documents you may be required to bring with you. You may be required to make an appointment.
